

Experiences with Eprints and DSpace

UNIVERSITY
of
GLASGOW

DPC Workshop – 24th June 2003

William J Nixon

DAEDALUS Project, University of Glasgow

DAEDALUS

- Part of the JISC FAIR Programme
- Funded until June 2005
- Building an Institutional model
- Partner with the CURL SHERPA Project
- Core strategic aim for the Library
- Two strands
 - Advocacy
 - Service Development

Issues which we are exploring

- Cultural
 - Encouraging deposit - content
 - Barriers to use and deposit
- Organisational
 - IPR and copyright
- Technical
 - Software
 - Metadata Standards
 - File formats

Range of Repositories

- Published and peer-reviewed papers
- Pre-prints, grey literature, technical reports, working papers
- Theses
- Research Finding Aids
- Administrative Documents
- Other objects: images, sound files, film clips
- Search service

Range of Software

- GNU Eprints (Southampton)
- DSpace (MIT & H-P)
- ETD-db (Virginia Tech)

All are OAI-PMH Compliant

Implementation at Glasgow

- Hardware
- Set-up and Installation
- Configuration
- Administration

Hardware

Both Eprints and DSpace
run on the same server

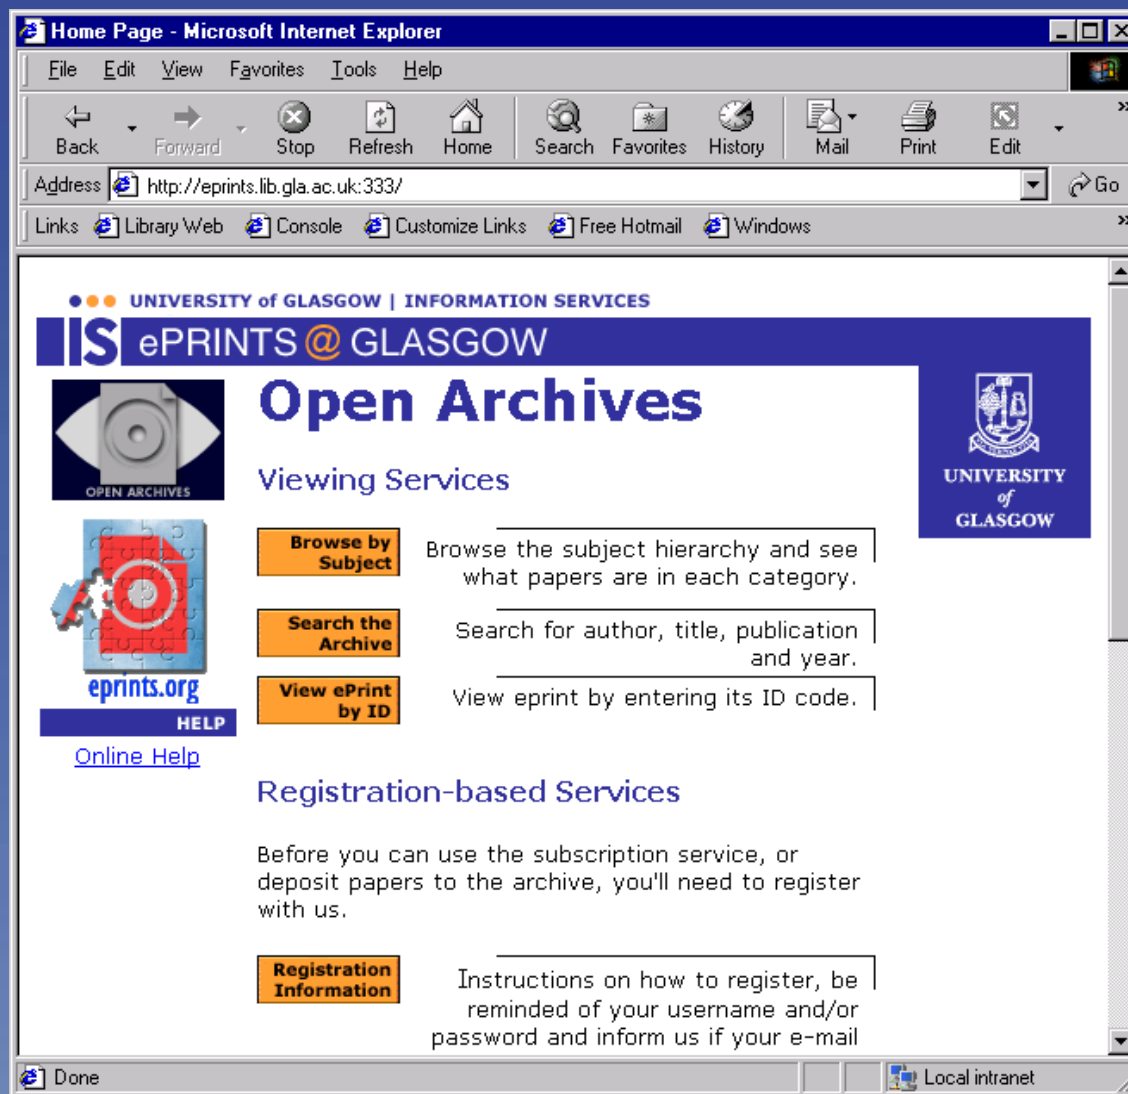

Sun Fire

- Solaris OS
- 4 Gbytes of Memory
- 12 x 36 GB Disks

GNU Eprints

- Developed at the Electronics and Computer Science Department of the University of Southampton.
- ePrints version 2.0 launched 14 Feb 02
- We are currently running 2.1.1
- 77+ sites now running ePrints
- <http://software.eprints.org>

eprints.org was previously supported by **CogPrints**, funded by JISC as part of its Electronic Libraries (eLib) Programme.

Courseware in academic library user education: a literature review from the GAELS Joint Electronic Library project

Joint, Nicholas and Kemp, Robert and Ashworth, Susan (2001) Courseware in academic library user education: a literature review from the GAELS Joint Electronic Library project. *Association for Learning Technology Journal* 9(3):26-42.

Abstract

The use of courseware for information skills teaching in academic libraries has been growing for a number of years. The GAELS project was required to create a set of learning materials to support Joint Electronic Library activity at Glasgow and Strathclyde Universities and conducted a literature review of the subject. This review discovered a range of factors common to successful library courseware implementations, such as the need for practitioners to feel a sense of ownership of the medium, a need for courseware customization to local information environments, and an emphasis on training packages for large bodies of undergraduates. However, we also noted underdeveloped aspects worthy of further attention, such as treatment of pedagogic issues in library CAL implementations and use of hypertextual learning materials for more advanced information skills training. We suggest ways of improving library teaching practice and further areas of research.

Type:	Journal article (on-line or printed)
Status:	Published
Refereed:	Yes
Keywords:	Computer-Aided Instruction; Computer-Mediated Communication Methods; Engineering; User education

Further Evaluation

- Customisation
- Workflow and deposit
- Metadata
- Scalability
- OAI-PMH implementation
- Further development

Eprints and DSpace

- GNU Eprints and DSpace are complementary products
- Both are highly effective tools for building institutional repositories
- Both require cultural change and advocacy to ensure that they have content and are used
