

# Licensing e-Journals in Perpetuity

A view from JISC Collections

Liam Earney

- Areas of interest
- Licensing activity
  - Changes over time
  - The Nesli2 licence today
- Entitlement Registry Scoping Study
  - Issues and Challenges
  - Attitudes

# JISC Collections & Perpetual Access

# Changing approaches

## Principle

- Inclusion of post-cancellation access in the model licence
- Weak on implementation

## Implementation

- What archival preservation services are publishers using?
- What are the triggers?
- Is post-cancellation access covered?
- What happens in cases of journal transfer?

## Practice

- Does the licence reflect the offer?
- What do I have the right to access?
  - Subscribed/unsubscribed
- Where can I access it? Agreements with LOCKSS and Portico

# The NESLi2 licence

- Covers the following
  - Preservation
    - ...and where?
  - Post-cancellation access
    - ...and how?
    - ...to what?
  - Journal Transfer
    - What arrangements are in place in the event of transfer to another publisher?

# Entitlement Registry Scoping Study

- Issues and Challenges
  - Availability of data
    - Incomplete publication information
    - Ability to output subscription information
  - Workload
  - Granularity?
    - Is it enough to know what was in a deal in a given year?
  - Year Zero
    - Do we collate the information moving forward?

# Attitudes

- This is not a core issue for all institutions
  - ‘Not an issue’
  - ‘Resolve when we lose access’
  - ‘Too much effort’
- BUT
  - Lots of discrepancies in test batches
  - Even if institutions aren’t abandoning ‘Big Deals’, essential part of the decision making process
