Consortial and Membership Organisations
We welcome applications from societies and consortia. Consortial membership can be a cheaper option allowing smaller agencies to participate in the Coalition but experience shows that membership can seem diluted for members of consortia. For example, if a large number of your members wish to attend DPC events, the consortia will have to allocate from a fixed number of reserved places. For that reason consortia are able to negotiate an extended subscription which will extend their access to the Coalition.

Students and Institutions Teaching Archiving, Librarianship, Records Management and Cognate Subjects
The DPC recognises the strategic importance in developing our student body, in supporting those institutions that teach information sciences, and it recognises that the needs of students and their institutions are distinctive. We already offer student travel grants to attend and support DPC meetings. Consequently, the DPC is exploring the creation of a new class of membership designed specifically for students and their teachers. More details including an application pack will be released in due-course.

Commercial Members and IT Vendors
Applications are welcome from the public and private sector. The DPC’s values include vendor neutrality. This protects the impartiality of our advisory services but is not intended to put off businesses that need to use the DPC as a source of advice for maintaining access to their own digital data and thus protecting their own valuable intellectual property. We are keen to help our members procure digital preservation services and we want the market for such services to mature through informed dialogue and mutual understanding.

Discounted Fees
Organisations that commit to a three year subscription are entitled to a 10 percent reduction in their annual fee. They may choose to pay in one lump sum or in three annual instalments.

How to Join
Download an application pack, visit the DPC website: www.dpconline.org or to start a conversation about joining, email us at: info@dpconline.org

Here’s why some of our members have joined:

Dr Sandra Collins of the Digital Repository of Ireland
“Joining the DPC means we can strengthen our relationships with others working in the field, work together in advocacy and awareness-raising, and participate in training and projects that help to build capacity in our sector.” (March 2013)

John Scally of Edinburgh University Library
“We have recently included digital preservation as a significant strategic theme in our forward plans and are joining the DPC to assist us in the framing of a plan to address this important area.” (February 2013)

Dr Janet Delve of Future Proof Computing Group at the University of Portsmouth
“We’re delighted to join the DPC as a way of amplifying and facilitating our research.” (April 2011)

Della Murphy of the National Library of Ireland
“The National Library of Ireland believes that working with partners in the DPC will vitally inform and support the implementation of best practice in relation to policy and infrastructural development in the area of digital preservation.” (March 2011)

Adam Rusbridge of the UK LOCKSS Alliance
“We’re keen to work together to coordinate an effective national strategy for at-risk scholarly material. We are also very interested in the DPC’s web archiving and preservation task force, it’s soon-to-be-established task force on audit and certification, and in learning about colleague’s approaches to digital preservation more generally.” (December 2010)

Here’s what people said about some of our events:

Commenting on the Preserving Computer Aided Design event, one participant said: “I don’t think people realise how many people/libraries/sectors use CAD! It seems to have a reputation as a niche format but it really isn’t. This perception needs to change.”

Commenting on the Collaborative Approaches to File Formats event, one participant said “It was... good to have it in the first place. Good speakers and time for discussion. Wouldn’t expect anything less from DPC.”

Commenting on the Preservation Metadata event one participant said: “The variety of presentations was excellent. Very robust round table.”

Commenting on the Trust and Digital Preservation event one participant said: “Excellent structure... all speakers ran to time. Good diversity of speakers. Nice balance between formality and friendliness; questions and comments welcomed. Very well organised!”

Getting Started in Digital Preservation
“... As a newcomer to this field, I found that the material was delivered in an appropriate and logical manner, which allowed an ease of understanding of the content.”

Preserving Digital Sound and Vision
“Great pace of presentations and a lively debate. Assisted greatly with my understanding of digital preservation and associated problems. Varied in level of discussion – scary but useful ... Excellent demos from presenters.”

Join Us!
There are three routes to participation in DPC’s activities:

- **Full Membership:** extended access to the Coalition and its staff and outputs as well as the opportunity to target the Coalition’s expertise on specific thematic areas.
- **Associate Membership:** priority access to events, programmes and publications and the opportunity to develop innovative cross sector partnerships.
- **Personal Membership:** for sole traders, consultants and recently graduated students: priority access to events, programmes and publications. Personal membership is a new class of membership so will be capped at 25 paying members in 2013-2014.

The following table summarises the benefits that accrue to different classes of member:

Enduring Digital Impact

If information is an asset, then durable information brings value and enables ongoing impact. Persuasive, fluid and ubiquitous: digital technologies are a defining feature of our age. Data is a core commodity for industry, commerce and government. It is fundamental for research, the law and medicine. The creative industries, cultural heritage and the media depend on reliable access to digital data. But digital resources – and the opportunities they create – are fragile. If we seek to extend and embed opportunity then we need robust solutions for enduring digital resources. The DPC, by creating the strategic importance, the greater the need for its presentation: digital preservation protects investment, captures potential and transmits opportunities to future generations and our own. It is a shared once-in-a-generation challenge.

Shared Challenge: Shared Vision

The Digital Preservation Coalition (DPC) is an agent for change, enhancing capacity, policy and practice for an enduring information infrastructure. Protecting long term access can seem daunting. Collaboration is the fastest and most economical way to address this emerging challenge: the DPC provides a ready-made expert network that will help your organisation meet its goals more rapidly, keep you up-to-date with a fast moving field, and amplify your expertise to a community eager for solutions.

The DPC is a not-for-profit membership organisation which raises awareness of the preservation of digital material and the attendant strategic, cultural and technological issues. It is an agenda setting and enabling body and its vision is to make our digital memory accessible tomorrow.

Greater Than the Sum of our Parts

The greatest strength of the DPC is our breadth of membership. Members include national memory institutions, higher education institutions, cultural heritage institutions, broadcasters, publishers, strategic investors and funding bodies. Each collects, creates or commissions digital content: each has to ensure a digital legacy which extends transmission opportunities for access and manipulation of data. Working together, the DPC’s forty two members share their expertise, co-ordinate tools and programmes, gain privileged access to advice and training and have a demonstrable influence in public policy.

Action and Impact

The DPC addresses a common challenge: we commission specialist advice in strategically important areas of technology development and we provide events where members learn from and influence state of the art technologists and policy makers. Our Technology Watch Reports series is widely quoted and our Action and Impact

Delivering Benefits

The DPC:

- helps you make your information more robust, more efficiently more effectively and more economically than if you were working on your own.
- creates a unified voice, covering many types of organisations and different sectors.
- gives a sense of solidarity for practitioners, exchanging practical experience and best practice.
- draws on and provides access to world-class expertise in the field from many sectors.
- responds to calls from funding bodies on behalf of members.
- supports your own strategic aims in the management of digital assets.
- facilitates community-wide participation in specialist projects and initiatives.

Members get direct benefits from:

- an annual consultancy with the Coalition.
- attendance and priority registration at DPC events which are free or heavily discounted for members.
- attendance at member-only networking and thematic events.
- priority access to reports and papers with the ability to annotate and share your comments online.
- privileged access to the expertise and services of the Coalition and its members.
- targeting and guiding the expertise of the Coalition.
- initiating strategically important research.
- knowledge exchange between members with similar challenges.
- shared tool and policy development.
- shared and credible advocacy for digital preservation.
- joint applications to funding agencies.
- participation in international initiatives including the TIMBUS project, the APARSEN ‘Network of Excellence’ and the Coalition to Clarify the Costs of Curation (4C) Project.

Our Values

In everything we do, the DPC:

- operates as a neutral body.
- embraces a consultative, innovative and open approach.
- engages in a collaborative manner with all stakeholders to comprehend and respond to their needs.
- maintains sound stewardship of the Coalition’s resources.
- shares best practice and knowledge transfer with our members to support their local priorities.
- maintains vendor neutrality.
- supports development of standards and generic approaches to digital preservation.

Indicative Programme 2013-2014

The DPC offers a programme of thematic invitational events and specialised publications throughout the year.

Task forces and working parties provide independently moderated spaces in which members can discuss, debate and resolve issues on highly targeted topics in an informal and – as the need arises – confidential way. These groups are open only to members.

Members get priority registration either for free or with a large subsidy. Non-members are often invited but only after members have registered and only if additional sponsorship is available.

The programme is approved and overseen by full members who commission thematic events that are tied directly to their own needs.

Members get priority access to publications through the members-only area of the website. This gives them an advantage when writing their own research, drafting policy or procuring services. Members are often invited but only after members have registered and only if additional sponsorship is available.

The Leadership Programme exists so that the DPC can provide scholarships to its members to attend events and training organised by other members. This is great news for the recipients of the scholarships and because it guarantees a number of paying participants, it reduces the risk for those running the events.

Leadership Programme

Scholarships released twice in year
Details to be announced
Sponsored events To be confirmed To be confirmed

Publications 2013-2014

What's new
News update and insight
Monthly throughout the year
