The Digital Preservation Coalition (DPC) and Digital Curation Centre (DCC) delivered a two-day workshop to explore the range of policies required to manage, preserve, and reuse the information held within digital repositories over time. This event was co-sponsored by the Oxford Internet Institute (OII) and held at Wolfson College at the University of Oxford on 3rd and 4th of July, 2006.

Developing and implementing a range of policies is vital for enabling the effective management, discovery, and re-usability of information held within digital repositories. This workshop provided concrete examples of the range and nature of the policies required and shared real-life experiences in implementing these policies through a series of case studies and panel discussions.

Monday July 3rd, 2006

Setting the Scene

- [Digital information life-cycles and policies \(PDF 31KB\)](#)
David Ryan, Director of Records, The Royal Household
- [Data Sharing and Curation Policies across the UK Research Councils \(PDF 56KB\)](#)
Mark Thorley, NERC

Session One: This session explored issues including: roles and responsibilities in developing policies, relationships with other institutional policies, workflow issues, key themes of specific policies, problems encountered during development .

- [Developing the NERC Data Policy \(PDF 382KB\)](#)
Mark Thorley, NERC
