

Database/Web Developer (Digital Archives)

Position type: 18 months, Full-time

Salary: £31,383 - £38,073 pa incl LW

Closing date: 15th November

Location: London

University of London Computer Centre (ULCC) is looking for a dynamic and experienced Web and Database Developer to join its expanding team of specialists in academic and research technologies.

ULCC is involved in a wide range of projects and services for the HE and cultural heritage sectors, in the UK and internationally, including systems for digital archives, libraries and research repositories. Our current and recent projects have included work on social networking, Web archiving, digital preservation, linked data, text-mining, and e-books.

The successful candidate will be expected to make a substantial contribution to two exciting new projects developing online tools for collaborative transcription, extending the work of the award-winning Transcribe Bentham project (a partnership with University College London). You will also be expected to contribute to our work on managing digital repositories for many London-based HEIs, and contribute proactively to new opportunities.
