# © in the Digital World

- © **Scanners – Scary movie or scary in the library?**
- © **WWW – what wonderful websites?**
- © **E-mail – potential for disaster**
- © **CD-ROM – more potential for more disaster**
- © **Intranets – Just as contentious as their big brother (sister)**
- © **E-books – easy-to-copy books?**
- © **VLE – virtual licence to encroach?**

# © in the Digital World

## Scanners

- © Should be treated with great care
- © Very faithful reproduction can be made
- © Manipulation is possible = potential problems with **moral rights**
- © Should there be a scanner in a library?
- © Unless it's your own material, you need permission to scan

# © in the Digital World

## World Wide Web - 1

- © **WWW – What wonderful websites?**
- © **Multiple copies of printouts? – I don't think so! – but then again, maybe you can!**
- © **WWW is not covered by any blanket licence – nor is it likely to be**
- © **The website host may not be the rights holder**

# © in the Digital World

## World Wide Web - 2

- © Read the copyright statement
- © Take care with deeplinking
- © Material that appears on the Web may be freely available, but it is not always free to copy
- © Websites are definitely protected by copyright and may also be protected by database right

# © in the Digital World

## E-mail

- © E-mail is a **literary work** which may also carry with it **artistic works** (graphic images), **tables** (databases) and if the system is strong enough, moving images (**film**). It may also carry **music**
- © E-mail can also be printed (**reproduction right**)

# © in the Digital World

## CD-ROM

- © **Print (Literary work)**
- © **Photographs, charts, illustrations, drawings (artistic works)**
- © **Video clips, animation (film works)**
- © **Sound (sound recording, musical work and literary work)**
- © **Database (database right)**

# © in the Digital World

## E-Books

**Be aware of the contract which accompanies an e-book – does it cut across your legal rights according to the CDPA 1988?**

# © in the Digital World

## *Virtual Learning Environments*

Potentially big problem area –  
please take particular care

Just because it's easy and quick to transfer text, images and sound from what may be cleared materials in the "analogue" environment to the digital environment, doesn't make it legal

# Electronic © - What is being done?

- © **Watermarking**
- © **Encryption**
- © **Click licences**
- © **Disabling Print facility**
- © **Timed licences**
- © **Unique identifiers**
- © **Compression**
- © **Levels of authentication**

# Electronic © - Who's doing what?

© **CLA** – Trial licence for photocopying and scanning

© **ERA** – Licence holders may digitise video clips onto intranets – watch this space for ERA Plus

© **NLA** – Yes, at frighteningly high cost

© **MCPS** – essential if music is being transferred

# FE and CLA's trial digitisation licence

Actual to Virtual

Sublime to Ridiculous?

How did we get here?

**Paper  
To  
Paper**

**Paper  
To  
Acetate**

**Paper  
To  
File**

*What can we do?*

# What we can't do

Copy from web sites

Copy from CD-ROMs

Edit, amend,  
manipulate, add to  
or delete from digital  
copies

# What we can't do 2

No placing on WWW

No public links

Copy, disseminate,  
publish, communicate  
or make available,  
repackage, distribute

FE and HE

ERA

**Record  
Licensed  
programmes**

**Make  
copies**

**Digitise  
and view  
in college**

*What can we do?*

# What we can't do

Allow programmes  
to be viewed outside  
college building

Copy bought content

Post to WWW

FE and HE

NLA

**Copy editorial  
but not ads or  
photos**

**Make  
copies**

*What can we do?*

**Who's watching who?**

**Who's counting?**

**Who's monitoring?**

**Who knows what's being done?**

**How will surveys be done?**

# The Future is

Bright?

Orange?

More  
expensive?

More  
complex?

# The Future is bright – the future is digital

- **Digital replaces analogue**
- **Digital = pay**
- **Digital can be monitored**
- **Digital can be controlled= pay per view**
- **Digital = contracts/licensing**
- **Contracts/licensing = loss of exceptions**
- **Loss of exceptions = loss of flexibility**

# Digital Rights Management

Management  
of Digital  
Rights

Digital  
Management  
of Rights

# Management of Digital Rights

- **Digital objects need to be managed**
- **Objects need to be identified**
- **Objects have rights (copy, publish etc)**
- **Objects need metadata**
- **Objects need common rules**

# Digital Management of Rights

- **Rights must be executed and enforced**
- **Execution**
  - **Secure containers**
  - **Encryption**
  - **Signature and Key Management**
  - **Rights Expression Languages**
  - **Watermarking**
  - **Fingerprinting**
  - **Access control**

# You need both parts

- **You can't have Management of Digital Rights without the Digital Management of Rights!!**
- **Setting the level is going to be very difficult – Rolls Royce or Mini?**
