ramme  
for Irish  
ological Research

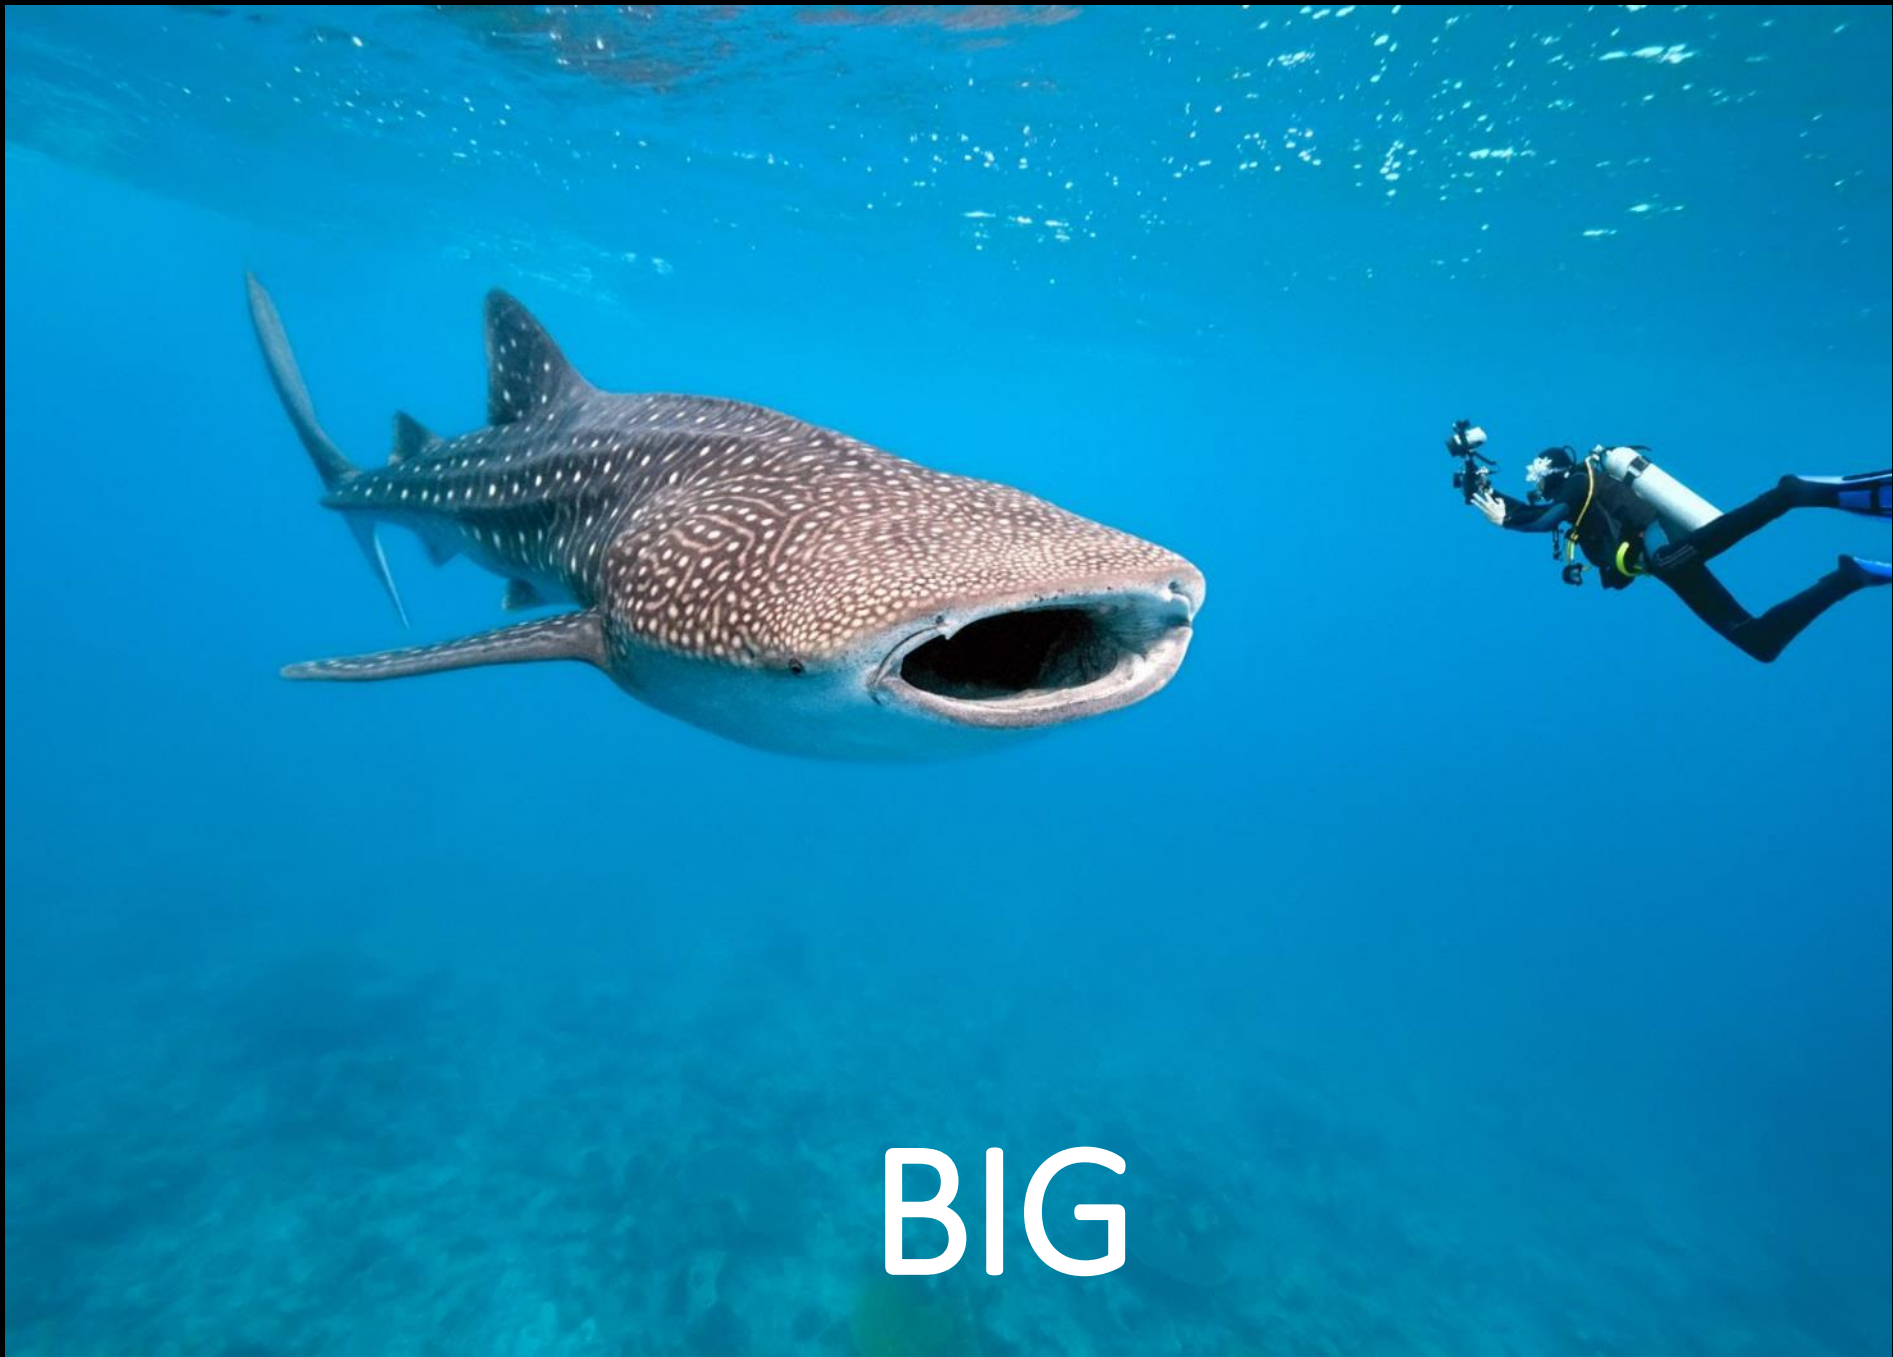

**Figure 3**

Figure is standing and holding bell and crozier, symbols of abbot's or bishop's authority, perhaps an actual churchman, or Christ as 'Abbot of the World'.

# METADATA & IPR

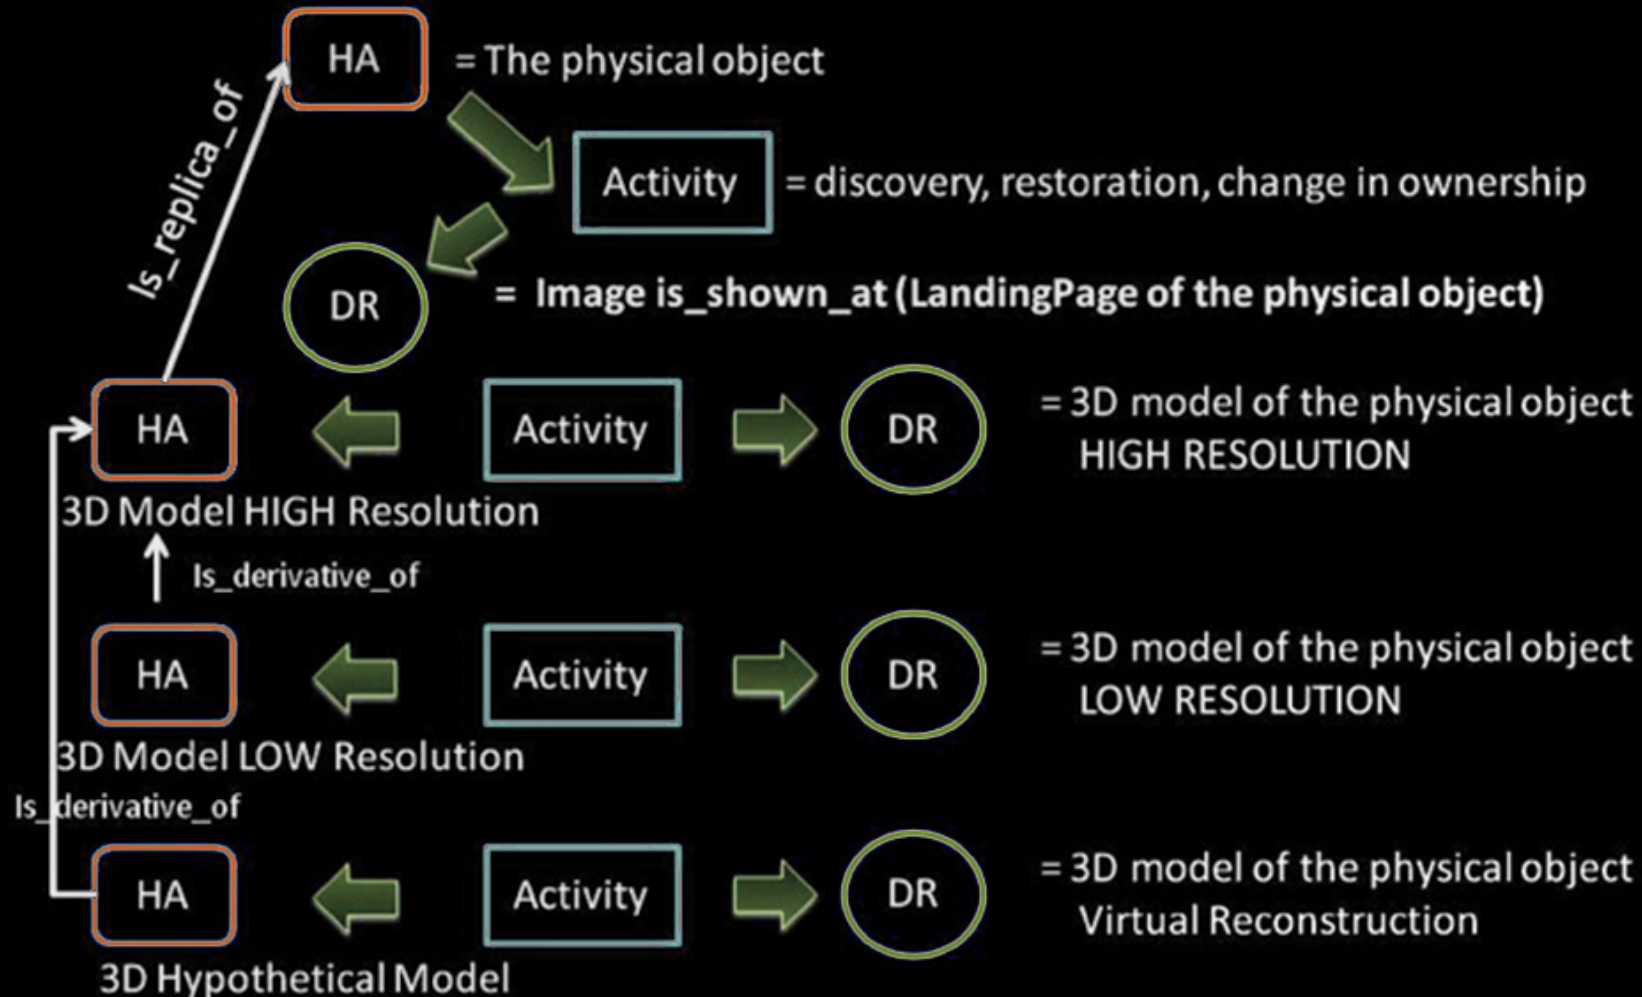

# Metadata - CARARE

Connecting ARchaeology and ARchitecture in Europeana

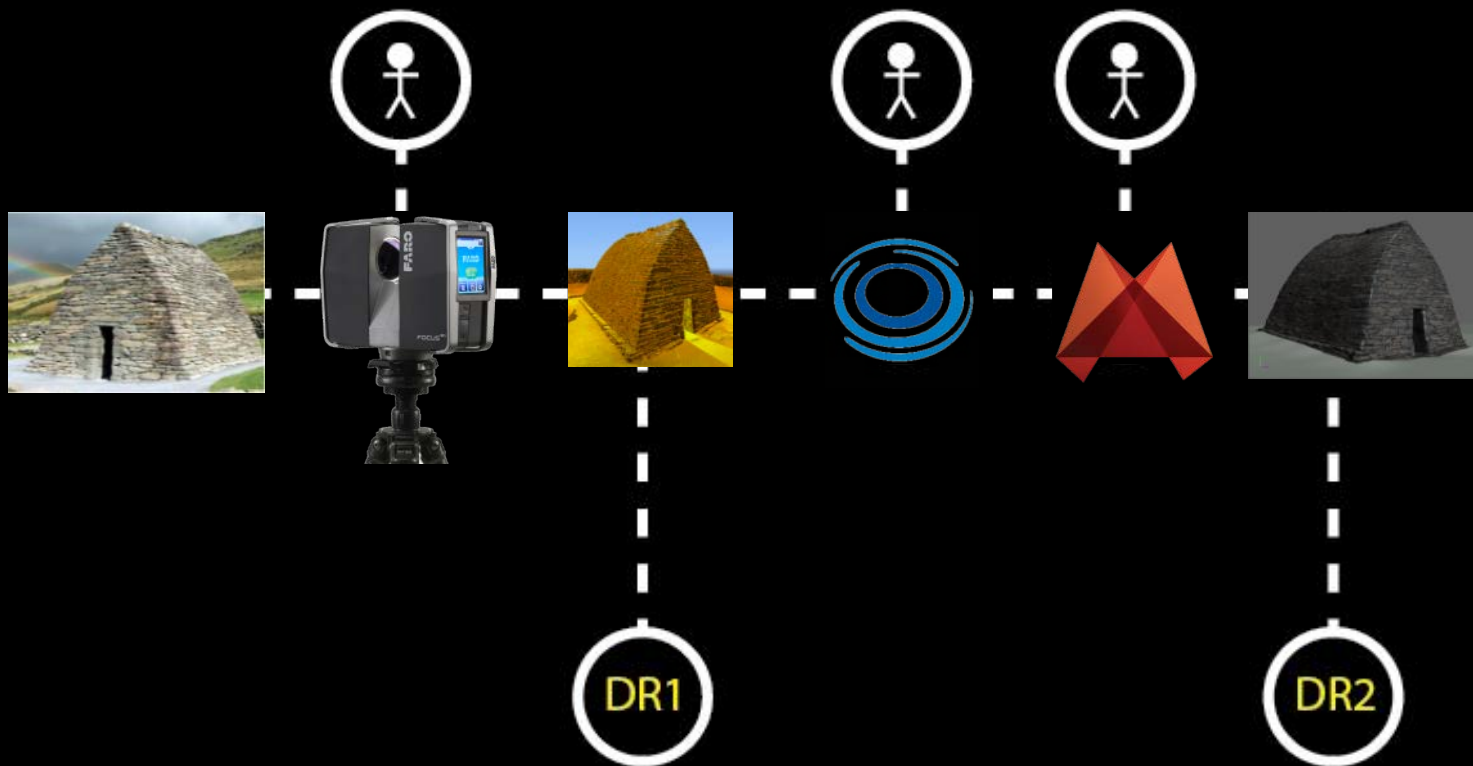

1. It describes in detail the artefact or monument which is being modelled in 3D and its provenance
2. It describes in detail the digital representation of artefact or monument and its online location
3. It provides technical information and quality insurance on the processes and methods utilised in the digitisation and modelling of heritage objects
4. It provides information on the access, licensing and reuse of the created 3D models and any associated digital content
5. It enables the search, discovery and reuse of content through the mapping of metadata to aggregators e.g. Europeana Data Model (EDM)

# Metadata - CARARE

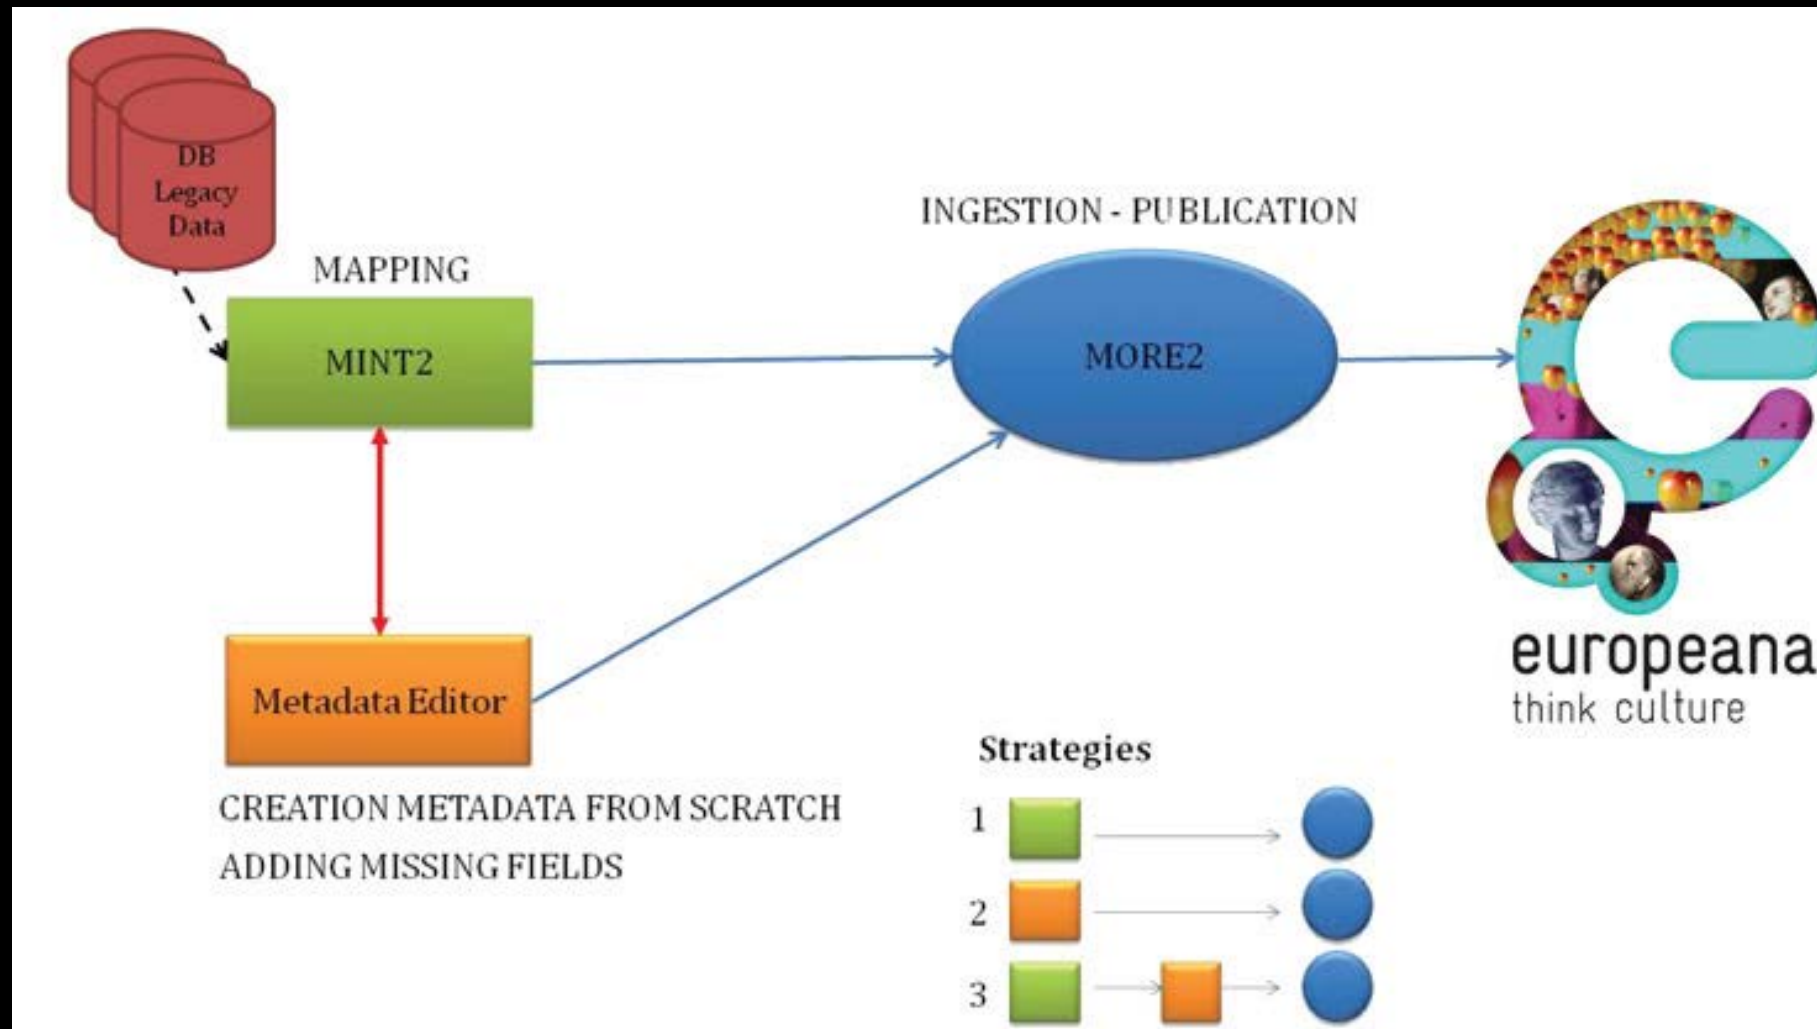

The partner has one or multiple 3D digital models as replicas of one physical object

# Irish Film Board

- Met with film commissioner of Irish Film Board
- Use 3D content as an enticement to production companies looking to film in Ireland:
  - Pre-production planning
  - Post production VFX
- Could money raised go towards scanning more heritage sites which the film board could market?
